Thank you for attending!

This panel is part of the Strategies for Interdisciplinary Publishing Success series, bringing together authors, editors, researchers, and students to share practical wisdom about the publishing process, with a focus on the challenges of publishing interdisciplinary work.

A video of this panel will be posted on the GW Libraries website at:

library.gwu.edu/collsci

The Collaboration Science Network

The Collaboration Science Network (CSN) is a group of faculty from across the university representative of different schools and departments dedicated to issues related to collaboration. As academic faculty, we work with partners from other universities and sectors on issues related to breaking barriers and expanding boundaries in research, education, policy, and organizational structures to ensure collaboration between diverse stakeholders.

To become a member of the CSN or to learn more about it contact Dr. Gaetano Lotrecchiano at glotrecc@gwu.edu

GW | Collaboration Science Network

Tuesday, April 1
1–2:30pm

Go Team!
Writing & Publishing in Collaborative Science

GW Libraries

GW | Office of the Vice President for Research
**Moderator:**

**Dr. Gaetano R. Lotrecchiano**

**Panelists:**

**Dr. Eric Hoffman**

Dr. Hoffman received his PhD from Johns Hopkins University, did post-doctoral work at Harvard Medical School, Boston Children’s Hospital, and has been a faculty member of Harvard, University of Pittsburgh, and George Washington University medical schools. He has been a strong proponent and practitioner of interdisciplinary and collaborative research in genetic disorders, leading collaborative multi-institutional efforts in gene identification, molecular diagnostics, pathophysiology, and therapeutics development. He has published over 400 papers, most with co-authors from different institutions and varied academic backgrounds. Current leadership roles include Director, Center for Genetic Medicine Research (Children’s National Medical Center), president-elect of TREAT-NMD (a trans-EU network; www.treat-nmd.eu), Scientific Director of the Cooperative International Neuromuscular Research Group (www.cimrresearch.org), PI of a NIH P50 Center of Research Translation, and PI of a NIH R24 National Center in Medical Rehabilitation Research (www.ncmrr.org).

**Dr. Shaista E. Khilji**

Shaista E. Khilji is Professor of Human and Organizational Learning & International Affairs at the George Washington University (GW) and founding editor-in-chief of the South Asian Journal of Global Business Research (Emerald Publications).

Prof. Khilji has a well-established expertise in cross-cultural diversity and leadership issues, particularly in emerging and developing economies- as these countries are increasingly faced with pressures to globalize and change. Her book entitled *Globalization, Change and Learning in South Asia* that highlights paradoxes and complexities of development in developing countries, was published in Oct 2013. Her most recent work focuses upon increasing social and economic empowerment at base of the pyramid. She is currently funded by US Department of State to develop an academic partnership between GW and LCWU (a women's university in Pakistan) in order to build capacity and improve people-to-people ties.

Prof. Khilji has published her work in many tier-1 academic journals and presented over 50 papers at international conferences. She has won many awards including the Best Reviewer, Best Service Achievement etc. from the prestigious Academy of Management, and GW’s Service Excellence Award in the Collaborative Group category for hosting the Clinton Global Initiative University at GW. She is multi-lingual- has native understanding of Hindi, Punjabi and Urdu and basic knowledge of Arabic and French.

**Dr. Ryan Watkins**

Ryan is an Associate Professor of Educational Technology in GSEHD. He is an author of 12 books, including books on needs assessment and knowledge exchange that are both available for free online through the World Bank. His book on e-learning is also the world’s best selling title on the topic. Ryan has published more than 90 articles and chapters, and is the developer of several websites including: www.NeedsAssessment.org, www.WeShareScience.com, and the new go.GWU.edu/csn.
