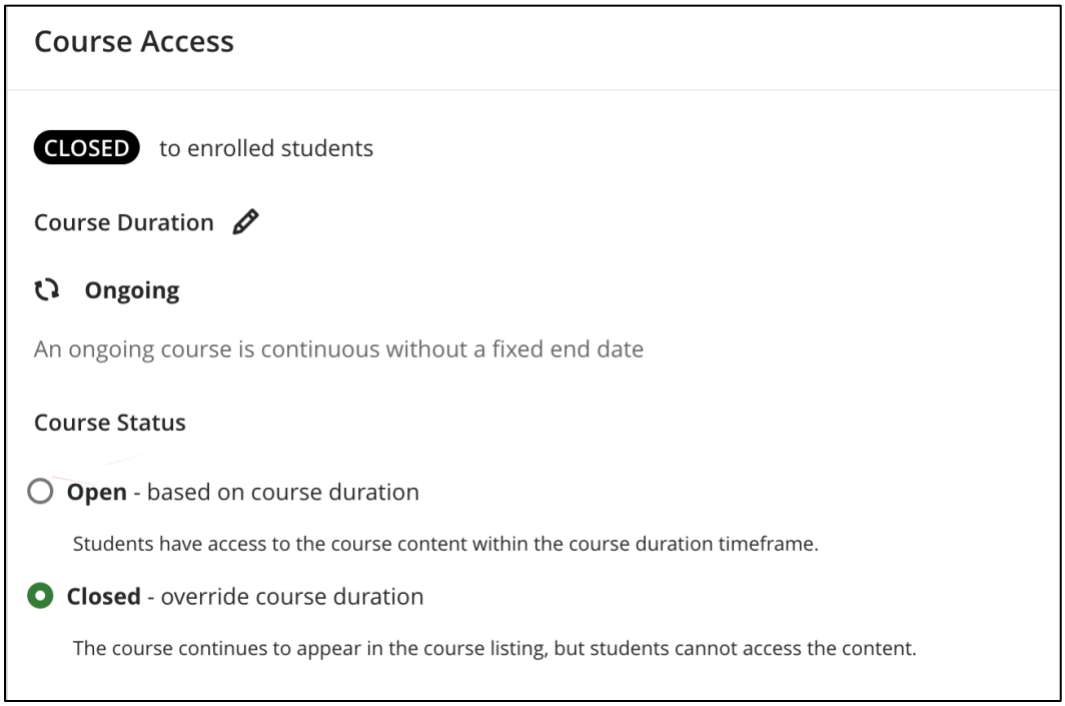
Blackboard Ultra: Make Course Available to Students

Blackboard courses are always accessible to instructors and teaching assistants; however, a course must be made available before students can access it. Both instructors and teaching assistants can make a course available or unavailable at any time.

1. On the Courses page, click on the three dots across from the name of the course that you would like to make available to students and click **Course Settings.**

*NOTE: The **Hide course from me** option only hides the course from the instructor's view. **It does not hide the course from students, nor does it make the course unavailable.***


2. Under the Course Access section that will appear, Click **Open** to open the course to students. (To revert the course to unavailable to students, click **Closed**).
